

What is claimed is:

1. An operating device in a vehicle; comprising hierarchical display screens on which an operation item for operating an operational object is displayed, wherein
5 the operation item is displayed on a predetermined screen, based on use of the operation item.
2. An operating device in a vehicle of claim 1, wherein said predetermined screen is the top screen.
3. An operating device in a vehicle of claim 1,
10 wherein said result is the number of times of use of the operational item.
4. An operating device in a vehicle of claim 3, wherein said number of times is accumulated for a period that is set based on outside environmental conditions or
15 user's physical condition.
5. An operating device in a vehicle of claim 1, wherein said operation item is displaced from the predetermined screen after a predetermined time has passed or a predetermined condition has been fulfilled.
- 20 6. An operating device in a vehicle of claim 3, wherein said number of items is predetermined.
7. An operating device in a vehicle of claim 1, wherein said result is stored in a portable storage medium.
- 25 8. An operating device in a vehicle of claim 1, wherein said result can be rewritten.
9. An operating device in a vehicle of claim 1, wherein said operational object is an air conditioning system, an audio system, a car navigation system, an
30 audio-visual system or a telephone system.
10. An operating device in a vehicle of claim 1; comprising an operating panel for operating said operational object, a display device having said hierarchical display screens and a control unit for
35 controlling the operational object, the operating panel and the display device, wherein the operating panel, the display device and the control unit are integrated into a

body.
